

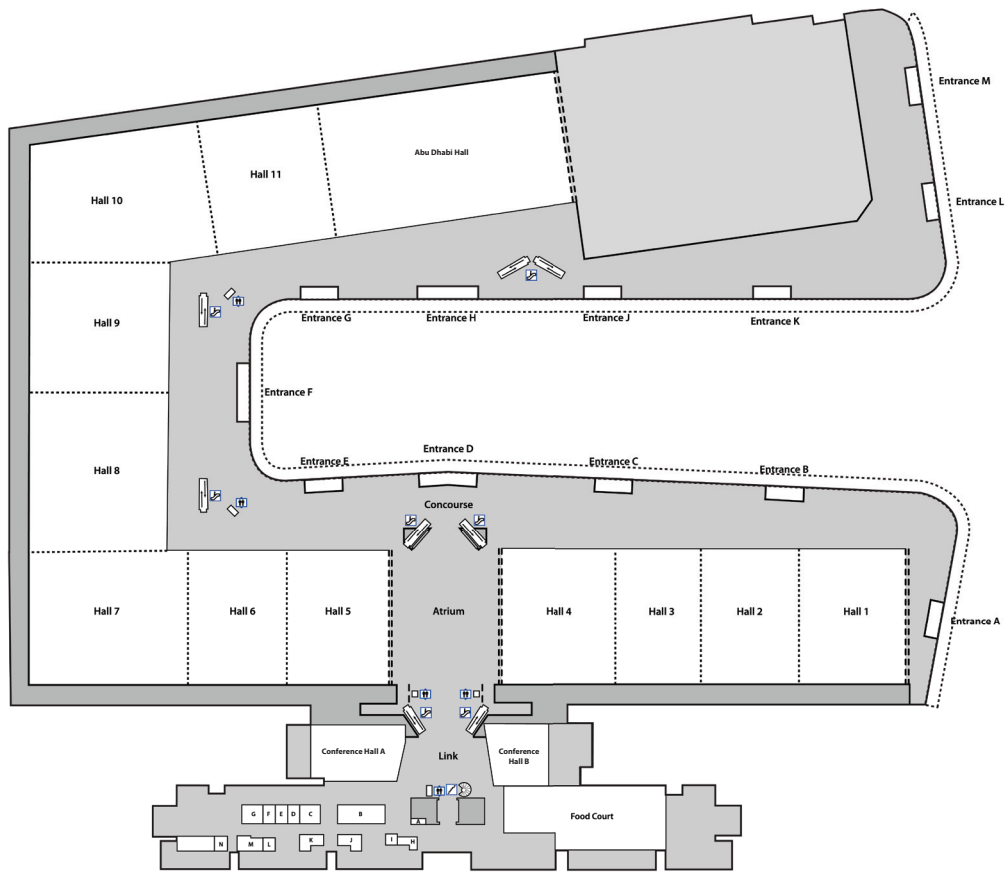

Exhibition Halls

The 12 exhibition halls of ADNEC, plus the Atrium, offer a total of 55,000sqm of inter-connected exhibition floor space to create the largest single indoor exhibition space in the Gulf.

The “front of hall” divider can be partially removed to allow shows to expand into the public Concourse area and the walls of Hall 4 and Hall 5 can be removed to allow shows to expand into the public Atrium area.

Each exhibition hall is fully airconditioned with wireless integrated I.T. facilities. Halls 1-11 have a clear ceiling height of 10m, while Abu Dhabi Hall has a ceiling height of 12m. The Atrium has a ceiling height of 14m and is also fully serviced by integrated wireless IT facilities.

Each exhibition hall has its own organisers’ office, fully equipped with administration equipment.

Access

All exhibition halls are accessed from the Visitor Concourse.
